

Frosty Factory

Frozen Beverage Equipment

Founded in 1982, Frosty Factory manufactures quality frozen beverage equipment. Our machines offer a variety of features:

Stand-by Switch

Allows the mix to remain refrigerated in the machine overnight. This saves valuable man-hours of daily cleaning and limits product handling which prevents product waste. Since the mix is held at 40 degrees, freeze down time is greatly reduced saving additional employee time.

Attractive Product Visibility

Our large clear faceplate and illuminated flavor sign draw the customer's eye to taste tempting frozen drinks that they can't resist.

Minimum Number of Parts

Easy to clean and operate.

High Production

Frosty Factory equipment can produce up to 35 gallons per hour of frozen product - that's **450** ten ounce servings every hour.

Product Consistency

Frosty Factory equipment produces consistently great tasting drinks by eliminating variations that occur when drinks are made in small batches. Our units allow for effective inventory control.

With profit margins of 500 to 1100% and beyond, frozen drinks are the most profitable item offered on the menu! Frosty Factory equipment provides premium quality drinks and lower serving costs

MAXIMIZING PROFITS!

Model 113

- **Capacity:** 3½ quart frozen
8 quart liquid storage
- **Dimensions:** 11"Wx19"Dx21½"H
- **Electric:** 115V optional 230V
- **Compressor:** 1/3 HP
- **Cooling:** Air

Model 117

- **Capacity:** 3½ quart frozen
12 quart liquid storage
- **Dimensions:** 11"Wx21"Dx25"H
- **Electric:** 115V optional 230V
- **Compressor:** 3/4 HP
- **Cooling:** Air

Model 127

- **Capacity:** 7 quart frozen
16 quart liquid storage
- **Dimensions:** 12"Wx26"Dx28"H
- **Electric:** 115V optional 230V
- **Compressor:** 3/4 HP
- **Cooling:** Air

Model 137

- **Capacity:** 12 quart frozen
12 quart liquid storage
- **Dimensions:** 16½"Wx26"Dx32"H
- **Electric:** 115V optional 230V
- **Compressor:** 3/4 HP
- **Cooling:** Air, optional water

Model 217

- **Capacity:** (2) 3½ quart frozen
(2) 8 quart liquid storage
- **Dimensions:** 16½"Wx26"Dx29"H
- **Electric:** 115V optional 230V
- **Compressor:** 3/4 HP
- **Cooling:** Air

Model 427

- **Capacity:** 7 quart frozen
12 quart liquid storage
 - **Dimensions:** 16½"Wx26½"Dx33"H
 - **Electric:** 115V optional 230V
 - **Compressor:** 3/4 HP
 - **Cooling:** Air
- Accommodates dairy products*

Model 289

- **Capacity:** 16 quart frozen
24 quart liquid storage
- **Dimensions:** 21"Wx33"Dx36"H
- **Electric:** 230V
- **Compressor:** 3 HP
- **Cooling:** Air, optional water or remote

Model 215F

- **Capacity:** (2) 7 quart frozen
(2) 12 quart liquid storage
- **Dimensions:** 25"Wx31"Dx56"H
- **Electric:** 230V
- **Compressor:** 3 HP
- **Cooling:** Air

Model 232

- **Capacity:** 12 quart frozen
12 quart liquid storage
- **Dimensions:** 16½"Wx26"Dx32"H
- **Electric:** 230V
- **Compressor:** 2 HP
- **Cooling:** Water

Model 115

- **Capacity:** 7 quart frozen
12 quart liquid storage
- **Dimensions:** 11"Wx21"Dx26"H
- **Electric:** 115V
- **Compressor:** 3 HP
- **Cooling:** Remote

Model 215

- **Capacity:** (2) 7 quart frozen
(2) 12 quart liquid storage
- **Dimensions:** 22½"Wx21"Dx29"H
- **Electric:** 115V optional 230V
- **Compressor:** 3 HP
- **Cooling:** Remote

Model 235

- **Capacity:** 12 quart frozen
12 quart liquid storage
- **Dimensions:** 16½"Wx26"Dx32"H
- **Electric:** 115V optional 230V
- **Compressor:** 3 HP
- **Cooling:** Remote

INSTALLATION

Air cooled units require a minimum of 12" of space on both sides and 6" or more in the rear.

Water-cooled machines require a water source and method of drainage.

Remote equipment requires refrigerant lines between the condensing unit and dispenser and a licensed contractor to charge the system.

Both water-cooled and remote machines can be placed side-by-side.

OPTIONS

FLEX LINES

Makes remote dispensers easier to re-position.

AUTO FILL

Allows the unit to be fed remotely rather than manually poured into the top of the unit.

AUTO-FILL TANK

Remote product fill system comes with 30 gallon tank on casters, pump and 25' of tubing.

MIXER

Mounted on either side of the machine. Provides the operator with blending capabilities.

STAINLESS STEEL FAUCET

Offers exceptional durability for those customers who move their equipment.

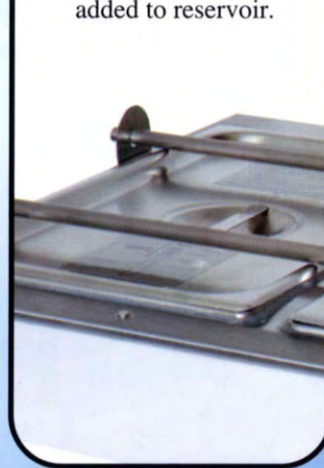

FAUCET LOCKS

Prevents unauthorized dispensing of product.

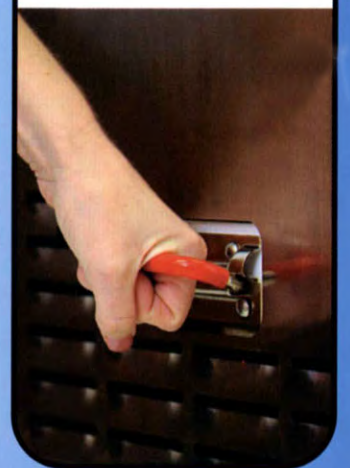

HOPPER LOCKS

Creates a tamper-proof environment so no additional liquid can be added to reservoir.

HANDLES

Provides portability. (Standard on models 113A, 117A, & 127A)

From lines of machines on daiquiri bars, to margarita machines in mexican restaurants, to frozen specialty drinks in coffee shops, to high volume equipment for stadiums and theme parks, Frosty Factory supplies equipment to a large variety of applications and serves the complete requirements of today's food service operators. Quality equipment and total customer support make Frosty Factory the only choice for frozen beverage equipment.
